Token overview

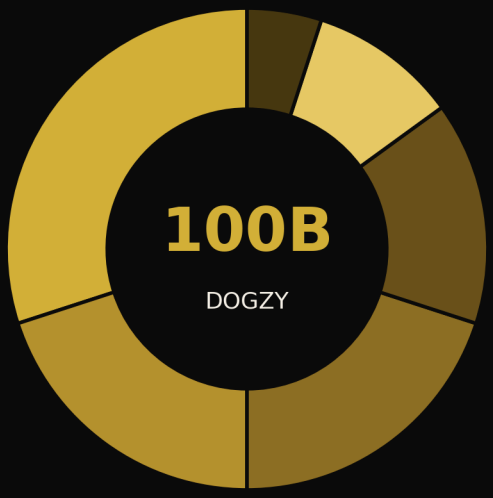

$DOGZY is the native utility token of the Dogzy Family Universe, deployed on Avalanche C-Chain. It is the shared currency of the three games that use it - Dogzy Family Universe (Monopoly), Dogzy Town (console) and The Adoles-chiant of Dogzy Town (web3): every purchase, reward, staking position and governance vote runs on DOGZY.

Token name	DOGZY
Type	Utility token (ERC-20 standard)
Network	Avalanche C-Chain (chainId 43114)
Total supply	100,000,000,000 DOGZY (fixed, no inflation)
Distribution start	Included with every Jetset VIP NFT - 1,000 DOGZY per NFT + Gold NFT characters (Dogzy Family Universe): 1,000 DOGZY each
Contract suite	8 smart contracts

Design principle: DOGZY is earned and spent inside a living entertainment ecosystem. Its value proposition rests on utility and engagement - not on speculative issuance.

Token allocation

- Community & NFT rewards — 30%
- Staking rewards — 20%
- Ecosystem treasury — 20%
- Founder (36-month vesting) — 15%
- Strategic partners (24-month vesting) — 10%
- Liquidity & listings — 5%

ALLOCATION	TOKENS	PURPOSE
Community & NFT rewards	30,000,000,000	Distributed via NFT inclusion, gameplay and city rewards
Staking rewards	20,000,000,000	Distributed via DogzyStaking over multi-year emissions
Ecosystem treasury	20,000,000,000	DAO-governed reserve: growth, partnerships, operations
Founder	15,000,000,000	Linear vesting over 36 months via DogzyVesting
Strategic partners	10,000,000,000	Linear vesting over 24 months via DogzyVesting
Liquidity & listings	5,000,000,000	DEX liquidity and exchange listings

Token utility

DOGZY is designed to circulate constantly across Dogzy Family Universe, Dogzy Town and The Adoles-chiant of Dogzy Town. Six core utilities drive demand:

In-city commerce

Buy accessories, buildings and services in Dogzy Town. A character's entire progression - from employee to business owner - runs on DOGZY.

Staking

Lock DOGZY in the DogzyStaking contract to earn rewards and unlock premium privileges in the city.

Governance

Vote on city decisions via DogzyGovernance, protected by an on-chain timelock. Councillor and mayor roles amplify voting weight.

Marketplace

The native currency of the DogzyMarketplace for trading characters, accessories and buildings - with perpetual royalties for creators.

Weekly Gold auctions

Gold-tier cards are auctioned every week; DOGZY is the bidding currency, creating recurring demand cycles.

Rewards engine

DogzyRewards distributes guaranteed token rewards to collectors - a fully compliant mechanism (no draws, no lottery).

Distribution mechanics

DOGZY enters circulation through engagement, not through a public token sale.

1

NFT inclusion

Every Jetset VIP NFT comes with 1,000 DOGZY. The first collection alone (58 characters x 20 editions) routes 1,160,000 DOGZY directly to collectors. Gold NFT characters from Dogzy Family Universe (Monopoly) also include 1,000 DOGZY each, delivered at the launch of The Adoles-chiant of Dogzy Town, and give 15% off the purchase of the same character in The Adoles-chiant of Dogzy Town.

2

Play and progress

Characters earn DOGZY by working, progressing and owning businesses in all three games - Dogzy Family Universe (Monopoly), Dogzy Town (console) and The Adoles-chiant of Dogzy Town (web3) - a reward for active participation.

3

Stake and govern

Collectors stake their earnings for yield and voting power, reducing circulating supply while deepening engagement.

4

Spend and circulate

DOGZY flows back into the loop through city commerce, auctions and the marketplace - with royalties feeding the treasury for long-term sustainability.

Compliance note: the launch reward model uses guaranteed token rewards rather than random draws. A separate licensed draw mechanism may follow after launch.

Smart contract architecture

Eight interconnected contracts form a complete on-chain economy with three critical protections: DAO governance timelock, marketplace approval verification and a hardened staking oracle.

DogzyToken
ERC-20 utility token - fixed supply of 100B

DogzyNFT
Character collections - 6 sub-collections, tiered editions

DogzyMarketplace
Native trading platform with royalty enforcement

DogzyTreasury
DAO-governed ecosystem reserve

DogzyStaking
Yield and privilege staking with secured price feeds

DogzyGovernance
Timelock-protected community voting

DogzyVesting
Linear vesting for the founder and partners

DogzyRewards
Guaranteed reward distribution engine

Network: Avalanche C-Chain (mainnet 43114 / Fuji testnet 43113), EVM “paris”. Deployment managed with a professional partner in Québec.

Principles and PontDogzy

Three principles govern how DOGZY is used and how in-game tokens move to the blockchain. They apply to all three games that share the token: Dogzy Family Universe (Monopoly), Dogzy Town (console) and The Adoles-chiant of Dogzy Town (web3).

Accessories in DOGZY

Accessories must be purchased with DOGZY in each of the three games.

In-game token export

Tokens earned in-game can be exported to a wallet and then exchanged for DOGZY. The exchange rate has not yet been set.

A character on both sides

To export tokens, a player must own a character on both sides: in the game and on the blockchain.

PontDogzy

PontDogzy connects the games to the Avalanche blockchain. Each export follows three steps:

1. A one-time code is displayed in the game
2. The server validates the code
3. DOGZY is minted on Avalanche

PontDogzy and token export apply to all three games: Dogzy Family Universe, Dogzy Town and The Adoles-chiant of Dogzy Town.

Deployment status

The token is not yet deployed on Avalanche.

Sustainability and safeguards

Fixed supply, no inflation

Hard cap of 100B. New circulation comes only from allocated reserves - never from new issuance.

Vesting alignment

Founder (36 months) and partner (24 months) tokens vest linearly on-chain via DogzyVesting - no cliff unlocks, verifiable by anyone.

Governed treasury

Ecosystem funds move only through timelock-protected DAO votes.

Royalty flywheel

Perpetual marketplace royalties continuously replenish the treasury, funding rewards and development without new issuance.

Compliance-first design

Guaranteed-reward launch mechanics.

Disclaimer: DOGZY is a utility token intended for use within the Dogzy Family Universe. This document is provided for information purposes only and does not constitute financial advice or an offer of securities. Figures reflect the token model at the time of writing and will be finalised at mainnet deployment.

The sky is not the limit. It's where Dogzy Town begins.
